LBA CONNECT

THE SOLUTION DESIGNED FOR REMOTE CONTROL OF AUTOMATIC BARRIERS AND OBSTACLES

LBA Connect is a fleet management solution designed for remote control of automatic barriers and obstacles equipped with the **ONE-C** board.

Thanks to a **gateway**, a **multi-operator SIM card** and a **secure application**, the installer can remotely take control of the equipment, monitor it, diagnose faults and plan preventive or corrective maintenance operations.

Simplified remote supervision, monitoring, and maintenance	Optimising travel through location	Quicker response times and more effective troubleshooting	Extended installed product service life thanks to the tracked maintenance plan

STANDARD CHARACTERISTICS

**Maintenance:**• Real-time email alerts
- Fault code if faulty product: to anticipate the reason for the service call
- Access to the service history entered via the mobile application
- Viewing the photos entered by the application

Checks:
- The installed product can be opened and closed in real time
- Keeps product in open or closed position
- Plan automatic opening and closing time slots or operating modes
- Overstay (BAM) alerts

Supervision:
- Product location with colour detail of product condition
- Number of products in the fleet
- Change in the number of cycles
- Statistics (site attendance/ schedules)
- Schedule of possible service calls by regular reporting
