

LBAi DETECT

SECURITY SYSTEM WITH ARTIFICIAL INTELLIGENCE CUSTOMISABLE SECURITY ZONES, WITHOUT STRUCTURAL WORK

Secure area without any structural work required (removal of security devices such as safety edges or magnetic loops)

Creation of an intelligent security zone to adapt the security behaviour according to the object detected *

Patented smart system adjustable to many products in the LBA/AMCO range

STANDARD CHARACTERISTICS

Default product configuration:

A camera (= 2 zones):

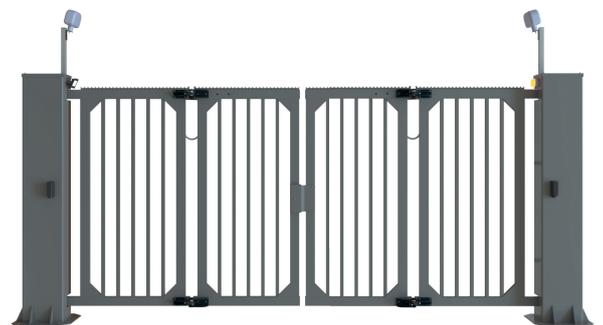

- 1 security zone covering the danger zone: detection of all types of vehicles and pedestrians
- 1 additional custom-configurable zone with personalised choice of types of users to be detected

NB 1: The list of detected users is as follows:

- Pedestrians
- Bikes
- Motorcycles
- Cars
- HGVs
- Buses

NB 2: The second zone can be superimposed on the security zone in order to adapt the behaviour according to the type of user detected.

- **Compatible products:** Barriers, w-gate bi fold gates, road blockers, retractable bollards, etc.

 INDUSTRY  PUBLIC & RESIDENTIAL  COMMERCIAL

* Subject to a Feasibility study carried out by LBA
